Activity 5: AI tools Activity

The first generated result is an AI-created image of a modern matcha café with a cozy, minimalist design. It features a green and beige color scheme, wooden furniture, indoor plants, warm lighting, and large windows that create a relaxing atmosphere. The image also showcases different matcha drinks, such as iced matcha latte and hot matcha latte,along with matcha-flavored pastries and cakes.

For the second generated result, I wanted the café to have a more sophisticated and minimalist look, with a predominantly black, white, and gray color scheme. Instead of having a very green or nature-inspired vibe, I focused more on clean lines, simple forms, dark furniture, monochromatic finishes, and subtle warm lighting. I wanted the space to feel refined, modern, and uncluttered, while still maintaining a calm and relaxing atmosphere. The matcha drinks and desserts provide subtle touches of green without making the café feel overly green. Compared to the first generated result, which has a warmer and more natural feel, I prefer the second concept because it better represents the simple, elegant, and modern minimalist aesthetic I want for the matcha café.
